

Psychology A Level and BTEC Applied

There is much that you can do to prepare for your new courses. Below are some suggestions. Please make a start if Psychology is something you wish to study (either at A level or BTEC level). Don't forget to carefully document this, so that you can show your teacher in September.

1. Free online courses

- a) Below is the link for a 5 hour introductory free course from the Open University – A certificate of participation is available.

<https://www.open.edu/openlearn/health-sports-psychology/psychology/starting-psychology/content-section-0?active-tab=content-tab>

Description: The most 'important and greatest puzzle' we face as humans is ourselves (Boring, 1950, p. 56). Humans are a puzzle, one that is complex, subtle and multi-layered, and it gets even more complicated as we evolve over time and change within different contexts. When answering the question 'what makes us who we are?' psychologists put forward a range of explanations about why people feel, think and behave the way they do. Just when psychologists seem to understand one bit of 'who we are' up pops some new evidence to show a different side! It is not easy to pin down all the many influences. This free course, Starting with psychology, makes a start.

- b) Another 5 hour free online course which allows you to study one of the most controversial experiments in Psychology.

<https://www.open.edu/openlearn/society-politics-law/sociology/psychological-research-obedience-and-ethics/content-section-0?active-tab=description-tab>

Description: In this free course, Psychological research, obedience and ethics, you will learn about the importance of ethics in research that is undertaken by psychologists. You will read about the famous study on obedience conducted by Stanley Milgram and watch two psychologists talk about their research with meerkats and chimpanzees.

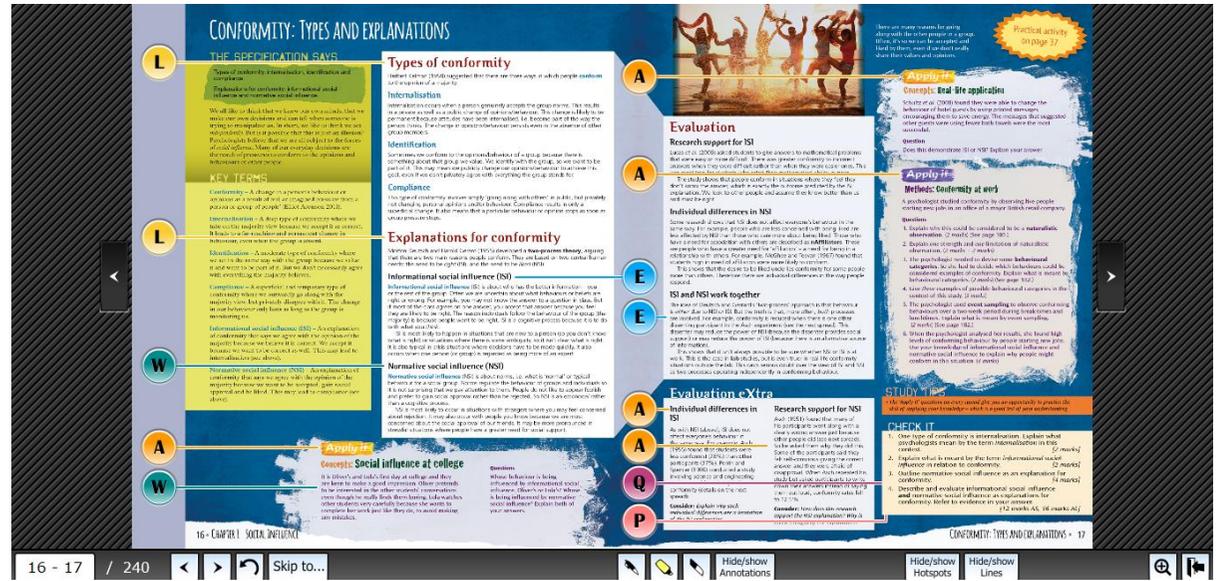

The open university course also has free courses on childhood attachment, forensic psychology and sports psychology.

2. Access our online textbook

<https://www.illuminate.digital/aqapsych1/>

You can only use this on a desktop/laptop and must maximise the screen in order to access the digital book. The user name is SHEREFORDSIXTH and the password is STUDENT.

This is an interactive book (see pictures below) where you can access answers and do quizzes for each page.

The book covers all of the Year 12 A level content, so anything you do from this will be very helpful for you when you start the course (whether A level or BTEC). Each spread contains many questions for you to think about. Try to write down your answers and check once you are done.

3. Download the Seneca App on your phone and access the course they have set up for prospective Psychology students.

The link is below.

<https://app.senecalearning.com/classroom/course/1b7f46e7-060b-4cf7-922b-1829a0013079>

4. Watch some Psychology related films/documentaries/TED talks

	TED Talks	Media Links	MOVIES

PSYCHOLOGY ENROLMENT WORK

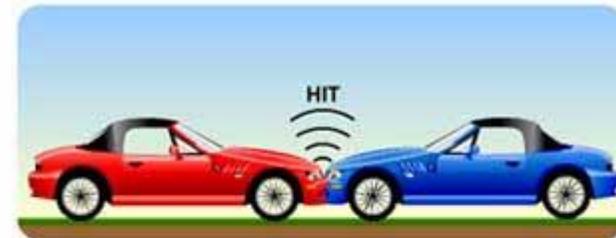

Please complete the following tasks in preparation for your first Psychology lesson. Your teacher will collect in this work.

Access the following website: <https://www.simplypsychology.org/loftus-palmer.html>

Read the information on Loftus and Palmer's study and answer the following questions on a separate piece of paper:

1. What was the aim of this study?
2. What Procedure was used in this study?
3. What were the findings from this study?
4. What were the conclusions from this study?
5. Summarise Experiment 2.
6. Outline 2 criticisms of these studies.

Access our online textbook <https://www.illuminate.digital/aqapsych1/>

You can only use this on a desktop/laptop and must maximise the screen in order to access the digital book. The user name is SHEREFORDSIXTH and the password is STUDENT.

Read and make brief notes on page 6-13
