Task 1: What is Society?

The social world is changing. Some argue it is growing; others say it is shrinking. The important point is that society does not remain static over time; it constantly changes – through decades, centuries; and across countries/societies.

Think about the following questions:

- Give 3 different ways society has changed over the last 100yrs – think about the different areas of social life and work.
- Why has society changed? Why are societies different?
- Research the 3 main political parties – Conservative, Labour and Liberal Democrats: What are their main ideas? How are they different?
